

Kerakoll Color Collection Colors and surfaces for contemporary living

Color Collection is the Kerakoll's brand collection of colors and surfaces for interior decoration. The Color Collection features a comprehensive range of eco-friendly decorative paints and resins for floors and walls, coordinated in a unique palette of 150 contemporary colors and 15 sophisticated surface textures in line with the most refined style trends of today.

Building on Kerakoll's original 10 colors, the collection has expanded to 150 coordinated shades inspired by classic Italian design. All colors are formulated with high-quality pigments combined with oils and natural active principles, characterized by unparalleled color depth and decorative impact. From pale pastels to rich, vibrant tones, the entire collection was devised to work tastefully together, allowing you to effortlessly mix tones and textures to create elegant contemporary interior concepts.

Colours

The 150 original shades that make up the Color Collection Chart work together as a chromatic path developed to enhance the most diverse choices of architecture, taste, style, and furniture. Each color is complementary to the others and can be used to create contrasts, matches, color scales, and juxtapositions. The chart is cleverly organized into 15 color families: Neutral Gray, Cold Gray, Navy Blue, Petrol Blue, Natural Green, Olive Green, Warm Gray, Greige, Modern Yellow, Dusty Yellow, Desert Peach, Neutral Pink, Rose Pink, Soft Lavender, and Violet, which make up the vertical columns. Horizontally, the chart is organized into pale, mid-tones, and intense shades, resulting in an intuitive and easy-to-read tool to devise your perfect color scheme.

Surfaces

Kerakoll's textures are an integral part of Color Collection. From seemingly spontaneous hand-trowelled marks to the organic grain of parquet wood, the look and feel of an inspired surface texture can completely transform a space. Ideal for walls, floors, and both indoor and outdoor use, each surface treatment is versatile, hard-wearing, and eco-friendly. Comprising Absolute, Decor, Wallcrete, Wallpaper, Patina, Stripe Living, Microresina, Microresina Floor, Microresina Parquet, Legno+Color, Cementoresina, Outdoor Paint and Outdoor Plaster, each surface was inspired by traditional craftsmanship and formulated to complement the Color Chart's 150 shades.

Absolute

Decorative water-based odourless paint with an extra-matt natural finish and high colour depth.

Decor

Decorative water-based resin-paint with an easy-to-sanitize matt finish and high colour intensity. Ideal to decorate walls needing a higher degree of washability (kitchens, bathrooms, kids bedrooms) and high foot-traffic areas (hallways and staircases).

Wallcrete, Wallcrete Living

Water-based resin covering with a coloured trowelled material texture.

Wallpaper, Wallpaper Living

Water-based resin covering with a coloured superflat smooth finish.

Patina, Patina Living

Water-based resin covering with an “old-look” plaster texture and natural shaded finish.

Stripe Living

Water-based resin covering with a coloured “old-look” micro-lined texture.

Microresina

Coloured water based micro-resin with lacquered matt finish for the re-design of all types of furnishing accessories, ceramic and wood coverings and floors.

Microresina Floor

Water-based ultra-thin film. Ideal to re-design already existing ceramic, cement and resin floors.

Microresina Parquet

Water-based ultra-thin film. Ideal to decorate and protect Legno+Color floors and to re-design hardwood floors.

Cementoresina, Cementoresina Wall

Resin floor and covering with a coloured-body trowelled texture and high-performance natural finish.

Legno+Color

Handcrafted oak parquet floor, decorated and protected on site with Microresina Parquet.

Invisibile

Painted wooden skirting board strip, in natural oak timber or to be coloured. Designed to match the wall colour.

Outdoor Paint

Decorative water-based paint for external use with a natural finish and high colour resistance. Unparalleled protection of the building from atmospheric agents.

Outdoor Plaster

Resin covering for external use with a coloured-body material texture and high colour resistance. Unparalleled protection of the building from atmospheric agents.

Sustainability

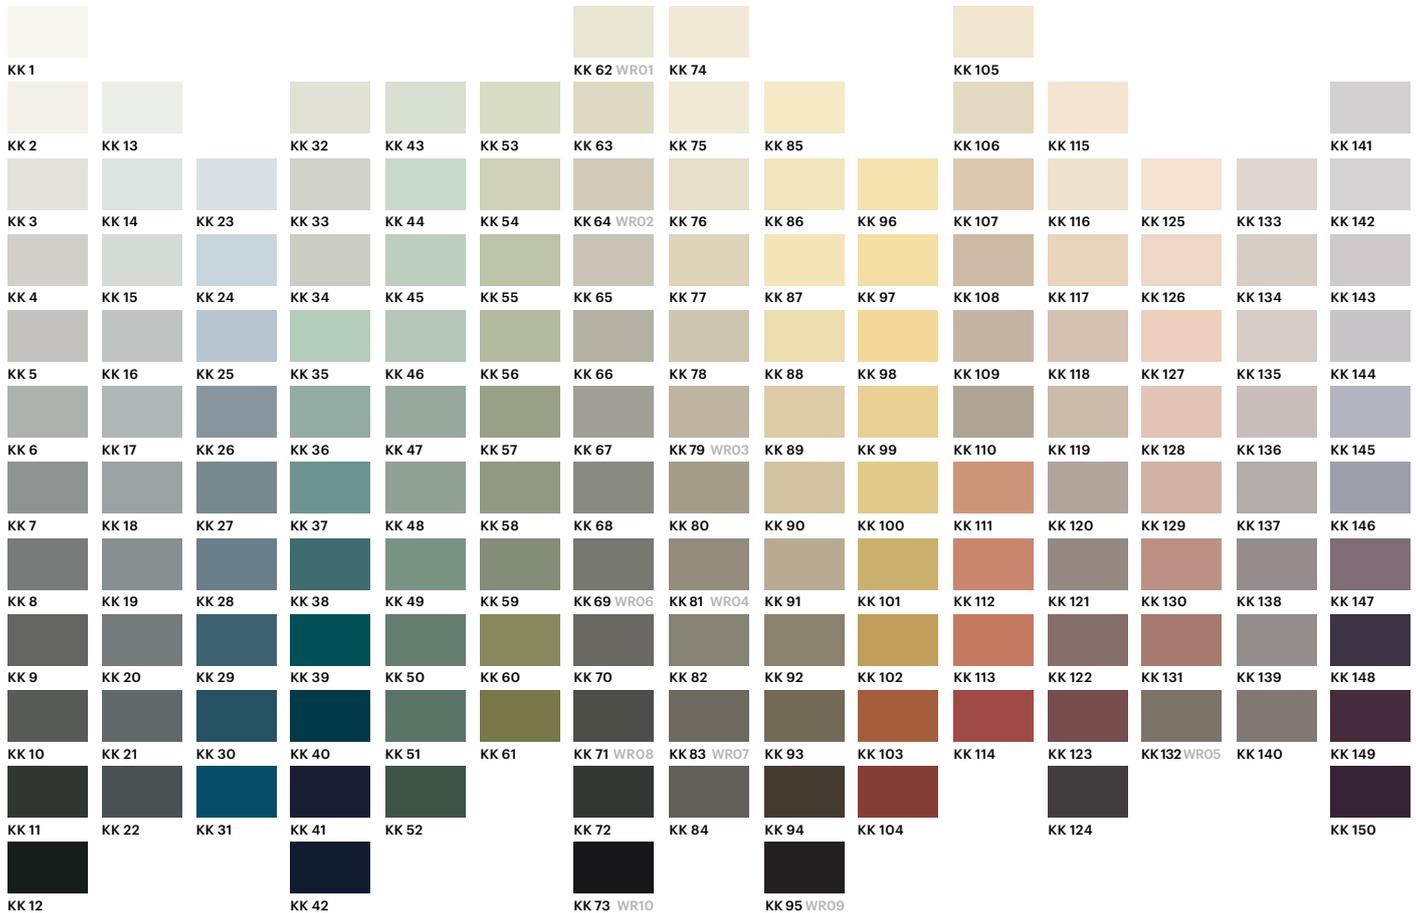

Kerakoll is committed to ensuring the highest quality certifications and to complying with international standards in all of its endeavors. With the Kerakoll GreenLab, the hub dedicated to the development of innovative technologies, the company supports scientific research in the field of sustainable design with a low environmental impact. All of Kerakoll's technically advanced paints are highly breathable, natural, and eco-friendly. They are 100% water-based and odor-free, as well as free from VOC, formaldehyde, alkylphenol ethoxylates (APEO), coalescers, plasticizers, and heavy metals. Choosing Kerakoll means choosing a safe, sustainable material and working with us towards a greener future.
